1. Mission & Vision Statement

Vision Statement

The department's goal is to provide a nationally renowned undergraduate program in chemical engineering with research strengths in the petrochemical industry, process safety, process systems engineering, water treatment, and artificial intelligence.

Mission Statement

1. Educate future leaders and innovators in chemical engineering and related disciplines to become successful career chemical engineers.
2. By engaging in academic research, chemical engineering knowledge is expanded.
3. To meet social demands, develop technology.
4. Through involvement in chemical engineering and related fields, we will advance the welfare of the Iraqi population.

2. Program Specifications

Program code:	BSc-ChE	ECTS	240
Duration:	4 levels, 8 Semesters	Method of Attendance:	Full Time

The Chemical Engineering program offered by Tikrit University are designed to assist you in acquiring the academic foundation required for a career as a professional engineer in the industrial, consultancy, and academic fields. You will develop the knowledge and abilities necessary to meet the challenges of industry and research in the twenty-first

century, including those relating to the design, construction, maintenance, and operation of a wide variety of systems. You will also gain the understanding necessary to work at the intersection of engineering and the chemical sciences..

3. Program Goals

The program educational objectives are to:

1. Prepare men and women to be successful as Chemical Engineers.
2. Participate in service projects that emphasize the societal advantages of engineering concepts with ethical consideration.
3. Be able to pursue graduate studies and dedicate to continuing professional growth and long-life learning through bridging engineering and non-engineering professions.

4. Graduates Outcomes

1. An ability to identify, formulate, and solve engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply the engineering design process to produce solutions that meet specified needs with consideration for public health and safety, and global, cultural, social, environmental, economic, and other factors as appropriate to the discipline.
3. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
4. An ability to communicate effectively with a range of audiences.
5. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
6. An ability to recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge.
7. An ability to function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment.

2. Credits, Grading and GPA

Credits

Tikrit University follows Bologna Learning Process with the European Credit Transfer System (ECTS) credit system. The total degree program number of ECTS is 240, 30 ECTS per semester. 1 ECTS is equivalent to 25 student workloads, including structured and unstructured workload.

Grading

Before the evaluation, the results are divided into two subgroups: pass and fail. Therefore, the results are independent of the students who failed a course. The grading system is defined as follows:

GRADING SCHEME مخطط الدرجات				
Group	Grade	التقدير	Marks (%)	Definition
Success Group (50 - 100)	A - Excellent	امتياز	90 - 100	Outstanding Performance
	B - Very Good	جيد جدا	80 - 89	Above average with some errors
	C - Good	جيد	70 - 79	Sound work with notable errors
	D - Satisfactory	متوسط	60 - 69	Fair but with major shortcomings
	E - Sufficient	مقبول	50 - 59	Work meets minimum criteria
Fail Group (0 - 49)	FX - Fail	مقبول بقرار	(45-49)	More work required but credit awarded
	F - Fail	راسب	(0-44)	Considerable amount of work required
Note:				
NB Decimal places above or below 0.5 will be rounded to the higher or lower full mark (for example a mark of 54.5 will be rounded to 55, whereas a mark of 54.4 will be rounded to 54. The University has a policy NOT to condone "near-pass fails" so the only adjustment to marks awarded by the original marker(s) will be the automatic rounding outlined above.				

Calculation of the Grade Point Average (GPA)

The GPA is calculated by the summation of each module score multiplied by its ECTS, all are divided by the program total ECTS.

GPA of a 4-year B.Sc. degrees:

$$\text{GPA} = [(1\text{st module score} \times \text{ECTS}) + (2\text{nd module score} \times \text{ECTS}) + \dots] / 240$$
